## Supporting a Successful Transition for Fragile Infants and their Families from the Newborn Intensive Care Unit Back to their Community

Amit Agrawal, MD, FAAP has been a member of the Envision team since August 2011. Dr. Agrawal is the Regional Medical Director for the Arizona Envision Neonatal programs.

He was born and raised in Glendale, AZ, and did his undergraduate training at ASU, graduating summa cum laude with honors.

He completed his medical training at Wake Forest University, in NC, and pursued his Pediatric Residency at University of California, Los Angeles.

He subsequently went back to the east coast where he completed his fellowship in Neonatal-Perinatal Medicine at Johns Hopkins Hospital.

In both his residency and fellowship, he won departmental awards for teaching and leadership, and has published research in the clinical area of premature lung development.

His passion is with innovation, neonatal program development, efficiency, sustainability and patient satisfaction.

He met his wife, who is a General Pediatrician, in medical school, and they have two children together.
